Weekly Math Homework –week 18

Teacher:

Monday		Tuesday	
Find the quotient. $12 \div \frac{2}{5} =$	What is the value of y? Circle the correct answer. $62y = 434$ $y = 7$ $y = 5$	Find the quotient. $\frac{5}{7} \div \frac{3}{4} =$	List 3 values that would make this inequality true. $2n > 6$ _____, _____, _____
Find the missing number of each unit rate. $\frac{45}{15} = \frac{?}{1}$ $\frac{27}{9} = \frac{?}{1}$	What is the GCF of 64 and 32? What is the LCM of 6 and 4?	Alfred made 21 goals in 3.5 minutes. What is Alfred's unit rate?	A Party Store sells large plates in packs of 12 and small plates in packs of 8. In order to have an equal number of both, what is the least amount of large plates that would have to be purchased?
Jackie made bracelets for 8 days. When he was done he had 96 bracelets. Write an equation to express how many bracelets Jackie made each day.	Amanda was 48 inches. She grew n inches last year and is now 56.5 inches. Write an expression that represents the number of inches Amanda grew.	While preparing for a party, Luis spent 25 minutes blowing up 10 balloons. Write an equation to express how many minutes it took him to blow up one balloon.	It takes Johnny 42 minutes to get to the zoo. After 18 minutes he stopped to get gas for his car. Write an equation to express how many more minutes he had to travel after getting gas.
Solve for g $72 - g = 36$	Solve for x $67 = 18 + x$	Solve for h $12h = 180$	Solve for x $144 = 8x$
