Tuesday: DUE THURSDAY!!!!!!
Slope Review:
Find the slope of a line passing through (-3, -5) and (2, 4)

Graph x = 2

Slope Review:
Find the slope of a line passing through (6, 3) and (6, 9)

Slope Review:
Find the slope of a line passing through (5, 7) and (2, 8)

Graph x = y

Derrick and his friends decide to go bowling. The cost for the group is $15 for shoe rentals plus $4.00 per game.
What is the rate of change?

Graph the function
$$y = -\frac{3}{2}x + 4$$

Graph: y = 5

Write the equation of a line in slope intercept form that has a slope of 1 and has a y-intercept of 8.

Graph the function
$$4x - 3y = 18$$

Write the equation of the line in slope intercept form.
