

**Monday**

Rewrite the following in interval notation  
 $x > 7$

Rewrite the following using inequalities.  
 $[3, 9)$

D = \_\_\_\_\_

R = \_\_\_\_\_

D = \_\_\_\_\_

R = \_\_\_\_\_

D = \_\_\_\_\_

R = \_\_\_\_\_

D = \_\_\_\_\_

R = \_\_\_\_\_

**Tuesday**

Rewrite the following in interval notation  
 $y \leq -8$

Rewrite the following using inequalities.  
 $(-\infty, \infty)$

D = \_\_\_\_\_

R = \_\_\_\_\_

D = \_\_\_\_\_

R = \_\_\_\_\_

D = \_\_\_\_\_

R = \_\_\_\_\_

D = \_\_\_\_\_

R = \_\_\_\_\_

**Wednesday**

Rewrite the following in interval notation  
 $-4 \leq x < 12$

Rewrite the following using inequalities.  
 $(5, \infty)$

D = \_\_\_\_\_  
 R = \_\_\_\_\_

D = \_\_\_\_\_  
 R = \_\_\_\_\_

D = \_\_\_\_\_

R = \_\_\_\_\_

D = \_\_\_\_\_  
 R = \_\_\_\_\_

**Thursday**

Rewrite the following in interval notation  
 $-6 < y < 0$

Rewrite the following using inequalities.  
 $[-2, 6]$

D = \_\_\_\_\_  
 R = \_\_\_\_\_

D = \_\_\_\_\_  
 R = \_\_\_\_\_

Graph the function using intercepts.  
 $4x - 3y = 18$
